

PUBLIC NOTICE

NOTICE OF AIRBORNE GEOPHYSICAL SURVEY VIA LOW-FLYING AIRCRAFT for CUMBERLAND and COLCHESTER COUNTIES

October 28, 2026 – Kavenex Energy Inc. is advising of an airborne geophysical survey in Cumberland and Colchester Counties. The survey will be conducted by Sander Geophysics Ltd, beginning in early November and lasting for approximately 2 weeks.

During survey operations, residents may observe low flying aircraft traveling along systemic flight lines of 500m apart in a grid pattern during daylight hours. The aircraft will be collecting gravity and magnetics readings to improve the geologic understanding of the subsurface.

All flights will be conducted with industry best practice and in accordance with Transport Canada regulations.
